

Connection

ELECTRICAL GROUP

CAPABILITY STATEMENT

INTRODUCTION

Connection Electrical Group is a complete service electrical contracting company servicing the Gold Coast surrounding regions.

The company was established by Tom Roberts, a highly skilled, experienced and greatly regarded Electrical Contractor who has the vision of creating a company that would be the market leader in the field of electrical and communication services.

The company is growing steadily and continues to attract new business through existing clients and word of mouth recommendations. Our strength is our ability to adapt to each individual client needs, the finished products speak for themselves.

Connection Electrical Group aspires to be the market leader which inspires honesty, safety and reliability that consistently exceeds customer's expectations. We can manage all of your electrical needs; from planning to commission, promising an unparalleled service, exceeding electrical safety and quality standards.

- Maintenance

HISTORY

Tom Roberts started his electrical journey in 2009 in Canberra where he worked with the leading electrical contractors in the state. In January 2017 Tom moved to the sunny Gold Coast and wasting no time founded Connection Electrical Group PTY LTD.

Connection Electrical Group, formally known as Connection Electrical and Data, has now employed 6 full time Tradesmen and has gradually categorized the company into four specific businesses. Electrical and data, Solar Solutions, Air Conditioning, and Excavation.

WORKPLACE HEALTH AND SAFETY

Safety is a core value at Connection Electrical Group Pty Ltd. Setting a high safety standard is crucial to our day to day operations. We believe in zero harm and so, are committed to providing a safe and healthy working environment for our workers, contractors and visitors.

All employees and sub-contractors at Connection Electrical Group are fully aware of the systems and kept updated on their ongoing responsibilities through company and project inductions, toolbox meetings and safe work methods. Safety Audits and inspections are conducted on our job sites to ensure the companies obligations to the Occupational Health, Safety and Welfare Act, Legislative standards and the Company Safety Policy.

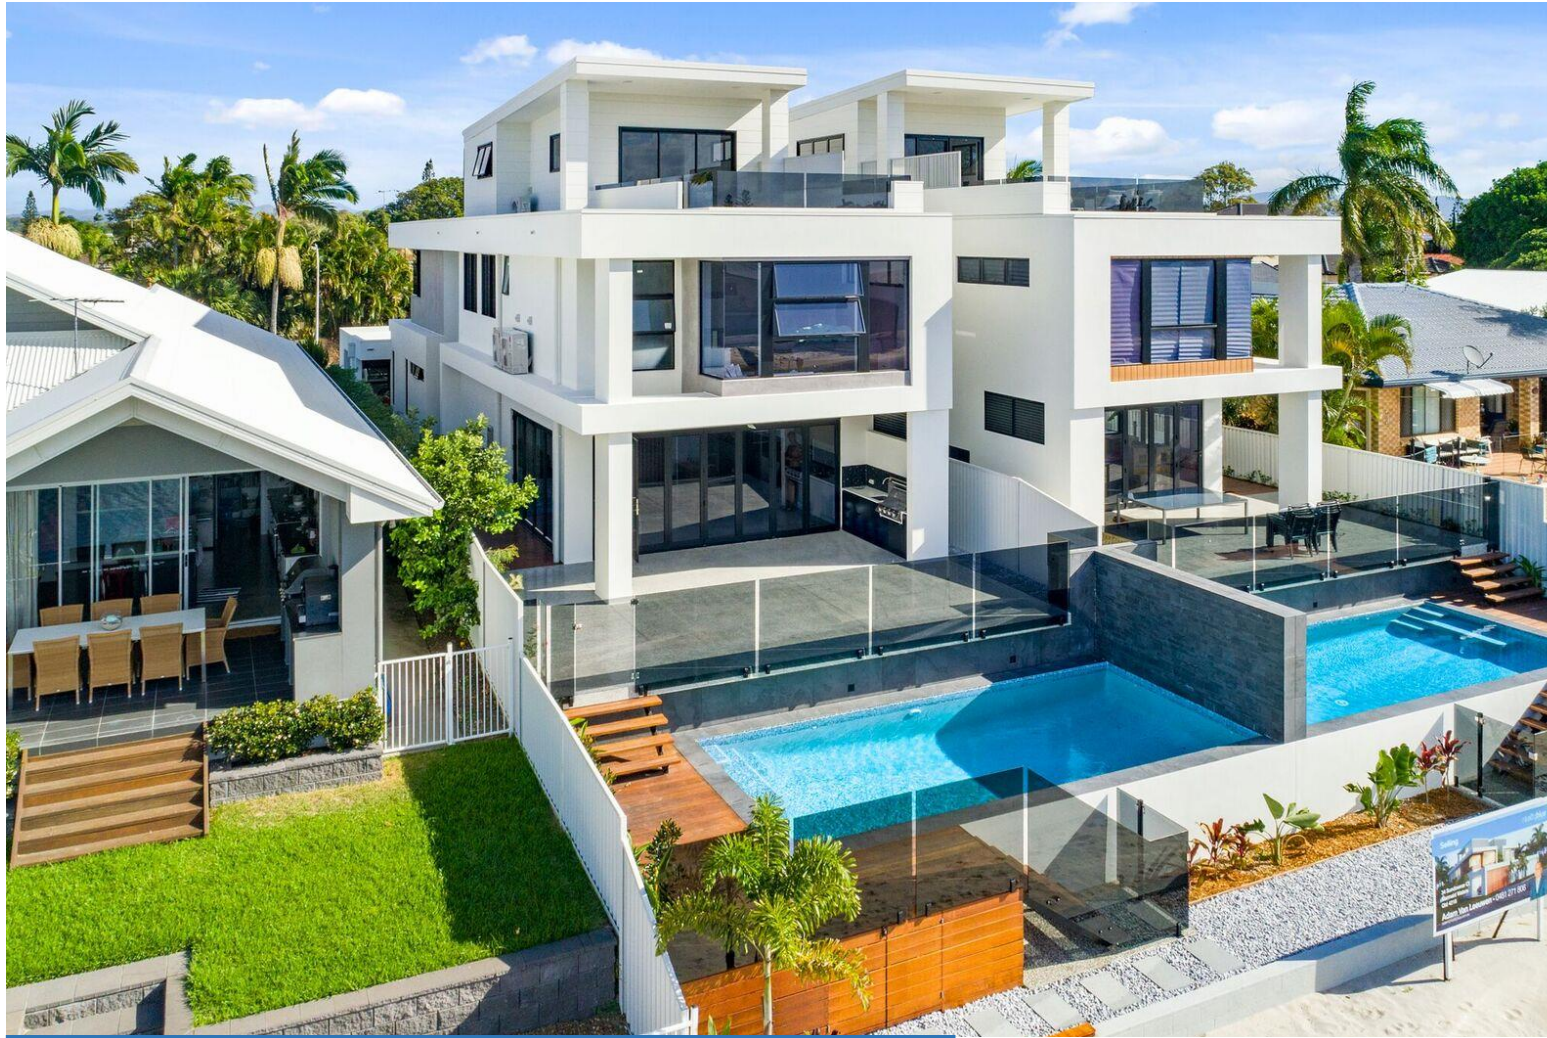

ENVIRONMENTAL MANAGEMENT

Connection Electrical Group is committed to minimising the impact of any environmental risks and/ or spill incidents occurring in the workplace. We have systems in place to ensure staff, facilities, equipment, stock, neighbours and the environment are protected at all times.

OUR COMMITMENT

Connection Electrical Group is committed to be the market leader with honesty, safety and reliability that consistently exceeds customer's expectations and always holds a high standard of work and company integrity.

We will work with you to design the most aesthetically pleasing and functional system with out compromising one or the other.

Solar energy is our future and a sound investment.

COMMERCIAL SOLAR

\$180,000 (before government STC rebate)

Included:

- Design and installation of 100kw solar system

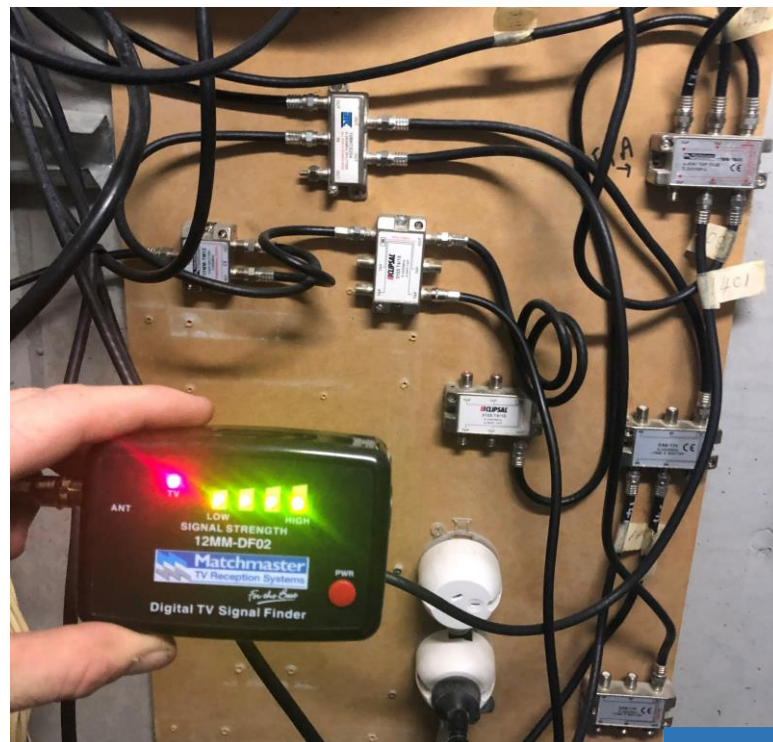

AUTOMATION

Ondine Court, Mermaid Waters

\$130,000

This project is a complete smart and automated home using Clipsal Cbus and Wiser App, with the help of Alexa. Features include the ability to turn showers on/off by voice control. It didn't stop there either. We also installed solar, multi-level audio, surround sound, security alarms, security CCTV, multi-level door access intercom/PA system, air conditioning and finally, electrical and communications.

MAINTENANCE

Ipanema Holiday Resort

We carried out quarterly and annual testing and compliance of switch boards, test & tagging and general site safety of electrical services.

We ran a monthly site check for all common areas involving replacement lamps or light fittings and emergency light testing where needed.

General tenant maintenance of smoke alarms, switch board verification and the occasional repairs of cooking appliances, air-conditioning and water heaters.

We offer a 24/7 emergency response for any unforeseen breakdowns and can manage all your electrical maintenance needs.

EXCAVATION

We have a 1.8 tonne excavator that allows us to provide our own trench digging for underground electrical services, we also attend to jobs for plumbers and the occasional builder for footings and site cleaning.

AIR-CONDITIONING

Our ARC license allows us to install split system air-conditioning and heat pump systems up to 18kw.

We specialise in ducted A/C units for new developments with zone control and app management to have multiple rooms at different temperatures.

We also frequently install wall mounted split system for smaller homes, apartments and those with smaller budgets in mind.
